

The British press, with its dignity and its clear conception of the importance of its mission, withheld any personal attacks had been made

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog, is an Adaptation of This Story

Synopsis

Barre, son of Kazan and Gray Wolf, reached the climax in the first chapter of his education when he saw an owl swoop down and kill a snowball rabbit. Then the gray owl attacked Barre. The dog buried his teeth in the bird's breast but the owl fastened its beak on Barre's ear. Barre's fangs closed on one of the owl's tender feet and the dog's ear was freed. Together the antagonists fell into a creek and the owl flew away.

CHAPTER III—Continued.

When he went on, continuing in the direction he had been following yesterday, he shunk along in a disheartened sort of way. His head and ears were no longer alert, and his curiosity was gone. He was not only stomach-hungry; mother-hunger rose above his physical yearning for something to eat. He wanted his mother as he had never wanted her before in his life. He wanted to snuggle his shivering little body close up to her and feel the warm caressing of her tongue and listen to the mothering whine of her voice. And he wanted Kazan, and the old windfall, and that big blue spot that was in the sky right over it. While he followed again along the edge of the creek, he whimpered for them as a child might grieve.

The forest grew more open after a time, and this cheered him up a little. Also the warmth of the sun was taking the ache out of his body. He grew hungrier and hungrier. He had depended entirely on Kazan and Gray Wolf for food. His parents had, in some ways, made a great baby of him. Gray Wolf's blindness accounted for this, for since his birth she had not taken up her hunting with Kazan, and it was quite natural that Barre

white sand. Across this sand, half an hour later, came a huge black bear.

Until Barre had seen the otters at play in the creek, his conceptions of the forests had not gone beyond his own kind, and such creatures as owls and rabbits and small feathered things. The otters had not frightened him, because he still measured things by size, and Nekik was not half as big as Kazan. But the bear was monster beside which Kazan would have stood as a mere pigmy. He was big. If nature was taking this way of introducing Barre to the fact that there were more important creatures in the forests than dogs and wolves, and owls and crayfish, she was driving the point home with a little more than necessary emphasis. For Wakayoo, the bear, weighed six hundred pounds if he weighed an ounce. He was fat and sleek from a month's feasting on fish. His shiny coat was like black velvet in the moonlight, and he walked with a curious rolling motion with his head hung low. The horror grew when he stopped broadside in the carpet of sand not more than feet from the rock under which Barre was sheltering as if he had theague.

It was quite evident that Wakayoo had caught scent of him in the air. Barre could hear him sniff—could hear his breathing—caught the starlight flashing in his reddish-brown eyes as they swung suspiciously toward the big boulder. If Barre could have known then that he—his insignificant little self—was making that monster actually nervous and uneasy, he would have given a yelp of joy. For Wakayoo, in spite of his size, was somewhat of a coward when it came to wolves.

"Across this sand, half an hour later, came a huge black bear."

should stick close to her, though more than once he had been filled with a great yearning to follow his father. Nature was hard at work trying to overcome its handicap now. It was struggling to impress on Barre that the time had now come when he must seek his own food.

With the thinning out of the forest the creek grew more shallow. It ran again over bars of sand and stones, and Barre began to nose along the edge of these. For a long time he had no success. The few crayfish that he saw were exceedingly lively and elusive, and all the channels were shut so tight that even Kazan's powerful jaws would have had difficulty in smashing them. It was almost noon when he caught his first crayfish, about as big as a man's forefinger. He devoured it ravenously. The taste of food gave him fresh courage. He caught two more crayfish during the afternoon.

With the approach of night Barre's fears and great loneliness returned. Before the day had quite gone he found himself in a shelter under a big rock, where there was a warm, soft bed of sand. Since his fight with Papayuchisew, he had travelled a long distance, and the rock under which he made his bed this night was at least eight or nine miles from the windfall. It was in the open of the creek bottom, with the dark forest of spruce and cedars close on either side; and when the moon rose, and the stars filled the sky, Barre could look out and see the water of the stream shimmering in a glow almost as bright as day. Directly in front of him, running to the water's edge, was a broad carpet of

And Barre carried the wolf-scent. It grew strong in Wakayoo's nose; and just then, as if to increase whatever nervousness was growing in him, there came from out of the forest behind him a long and wailing howl.

With an audible grunt, Wakayoo moved on. Wolves were pests, he argued. They wouldn't stand up and fight. They'd snap and yap at one's heels for hours at a time, and were always out of the way quicker than a wink when one turned on them. What was the use of hanging around where there were wolves, on a beautiful night like this? He lumbered on decisively. Barre could hear him splashing heavily through the water of the creek. Not until then did the wolf-dog draw a full breath. It was almost a gasp.

CHAPTER IV.

When Barre ventured forth from under his rock at the beginning of the next day, he was a much older puppy than when he met Papayuchisew, the young owl, in his path near the old windfall. If experience can be made to take the place of age, he had aged a great deal in the last forty-eight hours. In fact, he had passed almost out of puppyhood. He awoke with a new and much broader conception of the world. It was a big place. It was filled with many things, of which Kazan and Gray Wolf were not the most important. The monsters he had seen on the moonlit plot of sand had roused in him a new kind of caution, and the one greatest instinct of beasts—the primal understanding that it is the strong that prey upon the weak—was awakening swiftly in him.

If he could only find something to eat! That was the master thought that possessed Barre. Instinct had not yet impressed upon him that this which he saw all about him was starvation. He went on, seeking hopefully for food. But at last, as the hours passed, hope began to die out of him. The sun sank westwards. The sky grew less blue; a low wind began

to ride over the tops of the stubs, and now and then one of them fell with a startling crash.

Barre could go no farther. An hour before dusk he lay down in the open, weak and starved. The sun disappeared behind the forest. The moon rolled up from the east. The sky glittered with stars—and all through the night Barre lay as if dead. When morning came, he dragged himself to the stream for a drink. With his last strength he went on. It was the wolf urging him—compelling him to struggle to the best for his life. The dog in him wanted to lie down and die. But the wolf-spark in him burned stronger. In the end it won. Half a mile farther on he came again to the green timber.

(To be continued)

Demonstrated Her Strength

Female Chimpanzee At London Zoo Has Astonished Experts

The Zoological Gardens in London is continually meeting with fresh shocks and surprises. The animals always seem to have something fresh with which to astonish the experts.

This time it is "Daisy the Demon," a magnificent female chimpanzee, who has amazed her curators and keepers with feats of strength. "How strong is an ape?" is a riddle which has never been answered, but Daisy has just given the following demonstration as data.

A great section of a tree trunk, two feet in diameter, was placed in her cage as a rough and ready chair. It needed a couple of keepers to lift it into place. For a time Daisy used it properly, and then she turned it over with one hand and rolled it about.

This was rather a dangerous plaything. She might have hurt herself with it, and, also, she might have used it as a kind of battering ram against the wire meshes of her cage.

When a really big elm was felled in the Zoo, a fine section was sawed off for Daisy's benefit. This measured a full yard across and was nearly a yard high. It was not weighed, but it needed four keepers and a helping hand from Dr. G. M. Ververs, the superintendent of the gardens, to get it into the ape's cage.

Daisy regarded the new furniture with interest. She remembered the game she played with the old log and tried her strength on the new one. A heave and over it went.

Her ill-temper has doomed her to splinter-wood. The Zoo officials do not see why they should give her an expensive husband. It would be so wasteful.

Queen Birds In London Zoo

If Exposed to Rain Crimson Coloring Washes Out

The latest addition to the small birds' house in the Zoological Gardens in London, are a pair of birds from Abyssinia, known as Donaldson's Touracous—related to, though quite unlike, the cuckoo.

They are the first of their kind to reach Europe alive—or dead—for there is not even a skin of the species in the British Museum. Instead of the pointed crest of typical Touracous, the newcomers have a rounded one which they erect when excited.

Living among the tree-tops in the depth of the African forests, Touracous manage to keep well out of the rain, for it has been found that their crimson coloring is washed away upon exposure to a downpour.

This peculiarity led to the discovery of a new red pigment containing copper, which has been called "Touracin."

An African visitor to the Zoo told the keeper that his wife dyed a blouse with color obtained by steeping the quill feathers of Touracous in boiling water.

Fortunately for Touracous, they are not permanently disfigured by a shower of rain, for color washed out is quickly renewed.

Sees Orient Great Wheat Importer

A prophecy that the Orient would become, in the near future, a really large importer of Canadian wheat, was made by Hon. Dr. J. H. King, Ottawa, minister of public works.

In predicting increased Orient trade in grain, Dr. King pointed out that imports of wheat from Canada for 1923-24 increased 400 per cent.

Which Did She Want

She! I noticed you hesitated when I asked you if I was the only girl you had ever loved.

He: Yes; I couldn't tell from your expression whether you wanted me to say "No" or "Yes."

Fortune no longer knocks at a man's door. Have an electric button if you want to be in the push.

A waitress may not know a club from a spade, but she can easily raise the deuce by dropping a tray.

Mystery Man Of Arabia

Colonel Lawrence Was Great Figure In World War

The mystery man of Arabia, archaeologist, turned soldier and maker of kings, Colonel T. E. Lawrence, remained practically unknown until the end of the great war. Yet he was one of the greatest figures in the world struggle.

Members of the army medical board looked at the frail, five-foot-three, tow-headed youth, winked at one another, and told him to run home to his mother and wait for the next war.

Just four years after he had been turned down as physically unfit for the ranks, this young Oxford graduate, small of stature, shy and scholarly as ever, entered Damascus at the head of his victorious army.

In 1917 Lawrence and his associates, in co-operation with Faisal, Ali, Abdullah and Zeid, blew up 24 Turkish trains, tore up 15,000 rails and destroyed 57 bridges and culverts. During the 18 months that he led the Arabs they dynamited 79 trains and bridges.

With his Arab army ever increasing and becoming more efficient, Lawrence, aged 29, at the head of the Bedouin irregulars, eventually rode through the streets of Damascus.

In such small compass it is impossible to do justice to the exploits of Lawrence—of the times he went disguised into the Turkish lines, of his meeting with the Bedouin Robin Hood (an ancient gentleman who had slain 75 men, excluding Turks, in hand-to-hand combat in 17 years), of the wonderful battle he directed in the desert streets of the lost city of Petra, where the palaces, tombs, and amphitheatres have for hundreds of years been occupied only by the lizards and the jackals.

Good News For Italian Prisoners

An amnesty, a decree of far-reaching proportions, freeing all political offenders, except murderers, and releasing from the jails prisoners of all kinds, has been granted as an act of royal clemency, and as a contribution to national pacification, on the occasion of the completion of the quarter century reign of King Victor Emmanuel. It is estimated that between ten and 12,000 persons will be affected.

Snapping Him Up

Sam (viewing monkey in cage): "It's apparent to me."

Wilma: "Oh, really. I didn't know that the relationship was so close."

ONTARIO WOMAN REGAINS HEALTH

Wants Other Women to Know About Lydia E. Pinkham's Vegetable Compound

Mount Forest, Ont.—"Before I took Lydia E. Pinkham's Vegetable Compound I felt weak and miserable, and had pains all through me. I was living in Ailsa Craig at the time, and one day a friend came in and told me her experience of using the Vegetable Compound and advised me to take a bottle, which I finally did. I began to get stronger, and those pains left me. I am glad I found out about this medicine as I think there is none equal to it for women who have troubles of this kind. I cannot praise the Vegetable Compound too highly for the good it has done me. Whenever I know of a woman suffering I am glad to tell her of it."—Mrs. Wm. RIDSDALE, R.R. No. 1, Mount Forest, Ontario.

Women throughout the Dominion are finding health in Lydia E. Pinkham's Vegetable Compound.

No harmful drugs are used in its preparation—just roots and herbs—and it can be taken in safety even by a nursing mother. For sale by all druggists.

Made Unfortunate Start

After Two Mistakes Journalist Decided To Leave Town

One of the difficulties that beset even the best-intentioned journalists is told by one of that profession who decided to establish a newspaper in a "one horse" town, and was informed that a certain gallant colonel must at all costs be propitiated. His first number, therefore, contained a long article full of praise of the colonel's achievements, but unfortunately the headline, which should have read "Our Battle Scared Hero," appeared as, "Our Bottle Scared Hero," and an hour later the colonel, who liked his glass, was round looking for the editor with a shotgun. An explanation was with difficulty effected, and an apology and correction promised. Unfortunately the compositors again slipped, and the apology explained that "Bottle Scared Hero" should have read "Battle Scared Hero." When the enterprising journalist saw his paper he wisely sought the railroad depot and moved on.

Discovery Of Sheffield Plate

Fusing Of Silver and Copper Was Done Accidentally

It is said that Sheffield plate was accidentally discovered by Thomas Bolsover, when he was repairing the handle of a pocket-knife composed partly of silver and partly of copper, and in making his repairs accidentally fused the two metals. He at once conceived the idea of uniting these two metals and using this as a substitute for making articles which hitherto had been made of sterling silver only. He seems to have specialized in making small articles such as buckles, buttons, snuff-boxes and patch-boxes, some of which were only half an inch in diameter. He did not appreciate how important his discovery was, and consequently did not reap the full results from his remarkable invention.

New Sea Discovery

Scientists Find Spot Where Two Great Currents Meet

In a recent scientific expedition on the sea there was discovered a gigantic tide-race where two great currents meet. The mass of foam caused by their violent collision extended for miles, and in this foam great numbers of whales and porpoises wallowed, attracted by the immense supply of food. There were also great quantities of wreckage, covered with organisms, and fish of all kinds feeding on them. For the first time the scientists found the eggs of halibutes, the only marine insect in the world. The eggs are being hatched in tanks. Vast numbers of jelly fish colored the water purple for many square miles. The expedition caught more than 150 species of fish.

Caution Was Required

Judge Needed Gilt-edged Proof When Giving Up Cash

A former judge, who had become a cashier in a western bank, once declined to honor a check that a stranger had presented. "The check is all right," he said, "but the evidence you offer in identifying yourself as the person to whose order it is drawn is scarcely sufficient."

"I have known you to hang a man on less evidence, judge," was the stranger's response.

"Quite likely," replied the ex-judge; "but when we're giving up cold cash we have to be careful."

Most Valuable Stamp

A British Guinea postage stamp which was sold for a cent in 1856 is now valued at \$2,500. It is the only one of its denomination of that issue and is said to be the most valuable stamp in existence. The most valuable ever printed in the United States is one of a five cent issue from the town of Bosawen, New Hampshire, in 1846, and its value is \$12,000.

At the conclusion of the primary language class the teacher announced that the subject of the next lesson would be poetry, and then asked: "Can anyone tell me what poetry is?"

Little Chester immediately raised his hand, and upon being recognized, said: "Poetry is chickens."

Southern Alberta Wool Crop

With an estimate based on a price of 35 cents a pound, \$350,000 will be received by the southern Alberta wool growers for this season's wool of approximately a million pounds.

Mist: "How do you like your new laundry?" Hytte: "Very well indeed. I sent a dozen collars last week, and everyone of the buttonholes came back."

Mother: "Your face is very clean, but where did you get such dirty hands?"

Little Boy: "Washing my face."

Could Not Be Mistaken

Explorer Tells How Lizard Rejected Its Admirer

In "Adventures in Exploration at the World's End," William Beebe, the explorer, says:

No sooner had I passed beyond the open sandy beach of Galapagos Island, than little lizards began to dart along my path.

I crept up to the first one I saw, anxious to get a photograph, and while looking into my camera almost trod upon it, so tame was it. While waiting for it to turn sideways, a big male crawled between my feet and nodded frantically to a scarlet-throated female sunning herself on a bit of lava. He crept a little nearer, nodded again, whereupon the lady lizard rose as high as possible upon all four legs, making them look like straight little sticks, arched her body, blew herself up with air until she lost all semblance to a lizard, and, turning her head slowly, spat upon her admirer. He turned, nonchalantly caught a fly, and sadly made his way elsewhere. Never have I seen such a sudden transformation or a more unmistakable indication of disposition.

Last But Twelve Hours

Flowers of Night-Blooming Cereus Withers At Dawn

Of the many beautiful flowers of the Hawaiian Islands, the night-blooming cereus stands out by itself. It comes of the cactus family and is without competition, as it is the owl of the flower kingdom. The life of the flower is about twelve hours. The buds begin to open as the shades of night gather, and by the time darkness settles the flower is fully open. But with the coming of the morning it begins to close and wither, never to open again.

These flowers come in countless numbers and are nine inches in length and from six to eight inches across. The petals are snow-white, while the deep calyx is a rich yellow.

June, July and August is the blooming season, but there is only one night when the buds come forth in all their glory. On that night the people of Honolulu turn out to pay homage to this queen of flowers.

Eastern Countries

Still Use Palanquin

Modern Vehicles Used Only Where Roads Are Good

In China and India the palanquin, a sort of sedan-chair, still maintains its popularity as a safe, easy and convenient means of travel; indeed, in practically all eastern countries where the science of road-building has made but little progress save in the vicinity of larger cities, the use of wheeled vehicles is out of the question, and the palanquin, the howdah, and the saddle furnish the only means of journeying from place to place. Many years, perhaps generations, must elapse before these modes are superseded by modern contrivances, save along the great highways of travel and traffic where enterprise and capital have forced the construction of railroads.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

A Homely Illustration

Toasting Bread Shows Main Principle Accounting For Heat at Equator

Every time we toast a piece of bread we are illustrating the main principle which chiefly accounts for the earth being hotter at the equator than at the poles. If we hold the bread parallel with the fire, it gets the full heat, but if we tilt it slantwise, it takes longer to toast. The equator is the part of the earth's globe that gets the most direct rays from the sun, the poles the parts that get the most slanting rays. In the one case, we get a sun directly overhead at some part of the day; in the other, the sun at its very best only "rises" to a point low down on the horizon, and so gives off rays extremely on the slant. These slantwise rays, too, have to pass through much more atmosphere than the straight rays, and as our atmosphere acts as a sort of blanket, with its mists and fogs, it follows that the heat of the slanting rays is still further reduced in power. Other considerations also have their bearing upon the question, but the straight versus slantwise rays are the main factor in the comparative heat of the equator over the poles.

Decrease Expenses In Summer

Alaskan railroads save a great deal of money during the summer months because of the continuous sunshine. Switch lights are turned off early in June and not relighted until fall. This is the only railroad in America that is able to decrease expenses in this way.

Minard's Liniment for Aches and Pains

Good Salesmanship

Jew Decided Arguing With Customer Was Bad Business

A story is told of a Jew who was selling a suit of clothes to a customer. "It looks pretty well, but I doubt if it's all wool," said the customer.

"But do you like it?" replied the shopkeeper.

"Yes, I like it, but I don't think it is wool."

"Then, shall I wrap it up for you?"

"Sure," replied the customer; "I'll take it. But why didn't you argue with me?"

"Because," replied the merchant, holding out his hand for his money, "if I win the argument, I lose the sale; so what's the use?"

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Triumph

"There!" said the seaside girl, as she laid down her pen. "I think that's a record! Twenty-four postcards and only nine beginning. 'Just a line to let you know!'"

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

A German inventor has perfected a machine for measuring the height of aeroplanes. The apparatus times the echo from the craft to the ground within one ten-thousandth of a second.

The brain is the most variable in size and quality of all the parts of the human body.

The Right Way to Boil Potatoes

Put the potatoes in an SMP Enamelled Potato Pot. Cover with water. Add salt to taste. Boil until soft. When finished, drain off all the boiling water through the strainer spout. No danger of steam scalding the hands because the handle securely locks the cover on. If your family uses potatoes, you require one of these.

GLEICHEN, ALBERTA, WEDNESDAY

LABOR DAY DULY OBSERVED

Monday, Sept. 7, was Labor Day throughout Canada
and observed in Gleichen and district by great activity
on the part of our farmers and citizens generally this
being our busy harvest season.

The laboring men of varied trades throughout the
country are vitally essential to our every day life. They
are engaged in building a greater Canada by providing
dwelling places for our population, installing the latest
types of commodities, luxuries and actual necessities, con-
structing the home, the school, the office building and the
myriad of other types in the category of modern building
operations.

The well known and esteemed British sportsman, Sir
Thomas Lipton, is reported to have made the remark,
"There is no fun like work," and this admirably justifies
the workingman's pride in the duties faithfully per-
formed, giving him a distinct position of importance in our in-
dustrial life.

The laboring man need not deplore his lack of
scholarly attainments or collegiate honors, he is adequately
filling his niche by contributing individual honest ser-
vice in the nation's great program of activities.

And so Labor Day all should have a high regard for
honest and conscientious labor. A well known scholar has
written that we should all strive "to teach all men that
labor is honorable, and that we should strive to improve
the condition of the toiling millions. We are all work-
men in our several vocations, whether in actual labor, pre-
paring plans for the laborers, or studying the calculations
of philosophy, the advancement of civilization and knowl-
edge, the destruction of ignorance and barbarism."

Before the town stores became so numerous and so
abundantly stocked there was some defense for the mail
order concerns with their diversified stocks. There was
a time when the mail order house was the only place
supply all of his needs. But today your hometown stores
can furnish all of man's needs without delay, misunder-
standing the resident of the small town and country could
standings and uncertainty of satisfaction. Four essen-
tials in buying are quantity, quality, favorable price and
quick delivery. Your hometown merchants set the best
standard in all four of these essentials. And buy at home,
some even get all their printing at home.

You must learn not to overwork a dollar any more
than you would a horse. Three per cent is a small load
for it to draw; six, a safe one; when it pulls down ten
for you it's likely working out West and you've got to
watch to see it doesn't buck; when it makes twenty, you
own a blame good critter or a mighty foolish one, and you
want to make dead sure which; but if it draws a hundred
it's playing the races or something just as hard on horses
and dollars; and the first thing you know you won't even
have a carcass to haul you to the glue factory.

A preacher of recognized sincerity and humility ex-
presses our thoughts precisely in the following: "The
years and more of public service have brought the writer
face to face with every kind of character. It is but to
tell the truth to say that as between gossipers and other
moral perverts, I put the gossip at the bottom of the list.
The drunkard, the gambler, the thief, the murderer, are
all white and shining angels in my judgment, as com-
pared with the gossip. May heaven rid us of these long
tongued vipers that suck the blood of the good names and
pure character like some famished leech of torment."

We would rather meet a drunk man driving an auto
than just a plain fool. The latter tears by you at fifty
miles an hour, his car swaying from side to side, endan-
gering the lives of all those who happen on the road with
him and there seems to be no relief from his work. There
is no manner in which he can be reached. Of course
he will, in the course of time, meet his death in his reck-
less racing, but the trouble is that he will probably take
several souls with him on his journey to the other world
That is the pity of it.

Summer resort: A place where you sweat and fight
boredom and wonder when you eat.

Hope springs eternal until a spring breaks.

British teachers touring Canada
under the auspices of the Overseas
Educational League are now enjoy-
ing all the various forms of enter-
tainment to be found in the Cana-
dian Pacific Rockies. They have
been riding trails, hiking, fishing,
motoring, bathing in the sulphur
springs at the Banff Springs Hotel
and were the guests at a dinner there
given by J. M. Gibbon, secretary of
the Trail Riders of the Canadian
Rockies.

Confidence of United States capi-
tal in the Dominion, optimistic pre-
parations for the new Canadian
financing, prospects of a good crop,
large United States purchasing in
Canada, and heavy expenditures of
American tourists in the Dominion,
were some of the reasons offered by
New York financial experts for the
consistent above par stand of the
Canadian dollar on the New York ex-
change. The Canadian dollar is now
at a premium on the New York ex-
change.

The total number of students in
Canadian universities and colleges
in 1924 was 52,639, or nearly one in
eighteen of the total population, ac-
cording to a bulletin issued by the
Dominion Bureau of Statistics. Under
the category of colleges, the total
number in 1924 was 83. Of this
total six are agricultural, two tech-
nical, two law, one dental, one for
pharmacy, one for veterinary science,
28 theological, 39 affiliated, one
school for higher commercial studies,
one college of art and one military
college.

During the coming winter Canada
will see the debut of a new trans-
portation device known as the Snow-
motor. This consists of two hollow
cigar shaped cylinders or drums to
which flanges, resembling cork
screws, are attached. These drums
are fixed to an automobile or tractor
in the place of the wheels and,
by rotating actually float the ma-
chine over the snow. The snow-
motor is regarded as especially valu-
able in the transportation of lum-
ber; it can negotiate snow of any
depth and can operate in countries
where other methods of transporta-
tion are impossible or too costly and
can also make roads which other
vehicles can use. It is manufactured
in Detroit and will be on the market
in Montreal during the coming win-
ter.

If adversity builds character ours
certainly ought to be good.

Alice Discovers New Wonderland at Wembley

"The animals went into the Ark in case it should rain." "Long John Silver was also there."

"I know what we'll do," said Alice, "let's go to Wem-
bley." "What do you want to go to Wembley for?"
asked the Walrus, who was always asking foolish ques-
tions anyway.

"I want to see the sailing ships and sailing-wax and
cabbages and kings," replied Alice.

"Ha, ha," laughed the Walrus, "you won't see any
sailing-wax there, it's all at Madame Tussauds and I
have my doubts about the cabbages, too."

"Well, I shall see lots of sailing ships and kings,"
said Alice starting to cry, for she was very fond of
cabbages, "and, anyway, if you go to the Exhibition
alone you won't be able to get in to Treasure Island as
they don't admit adults unless they are escorted by
children."

"Oh, all right," said the Walrus, who, being 182
years old, no longer regarded himself as a child and
had secretly wanted to go to Treasure Island all the
time.

So away they went.

When they arrived at Treasure Island they found a
real train—not a very big one, it is true, but, neverthe-
less, the real train in the world—puffing like a
steamship, at a little station labelled Banff, as if anxious
to get on its way around Wonderland.

"Look," said Alice, "there's Peter Pan."

"That isn't Peter Pan," said the Walrus, whose edu-
cation had been sadly neglected, "that's a Canadian
Pacific engine."

"I don't care," answered Alice, starting to cry again,
for, like all modern children, she hated to be con-
tracted by her elders, "it's called Peter Pan because it
goes everywhere and never gets old or tired."

This reference to his age effectively subdued the Walrus,
who now elapsed into silence, and didn't say another
word until they were seated in the little train and slow-
ly pulling out of Banff.

It would take too long to describe all the things they
saw or all the wonderful people they met, but they
had such an interesting time that Alice soon forgot all
about her cabbages and sailing-wax.

There was Long John Silver, with his one eye and
wooden leg and piratical disposition; and there were
Mother Goose, Sir Francis Drake, Robinson Crusoe and
Man Friday, Humpty Dumpty, Little Bo Peep, Jack and
Gill and all the other fairyland people Alice had read
about but never met before. And they saw the ani-
mals going into the Ark which Noah had provided for
them in case a rainy day should come along and wash
off all their paint.

Of course, they saw lots of other things, too — the
Rocky Mountains, for instance, and the Golden Hind.

"While we're about it," said Alice, when they had
seen all there was to see at Treasure Island, "we
might as well go in and see the 'Canadian Pacific
Pavilion. Everybody goes there, you know." So in
they went, and saw all the good things to eat and wear
and work with that they have in Canada. They were
shown around the building by a big man in blue who
had "C.P.R." on his epaulettes, and explained to them
that the initials meant Canadian Pacific Railway, and
that they had put up this building and made Treasure
Island in order to let the boys and girls in England
know what a fine country Canada is. But it presently
began to get dark and Alice had to take the Walrus
home and give him a bath before he went to bed.

"Well, that's that," remarked the Walrus, when they
got outside.

"Of course, it is," replied Alice, "what else would it
be?" "I mean it's all over now," grumbled the Wal-
rus who had been annoyed because Alice had refused
to allow him to go into the Ark with the other animals,
"and you didn't see any sailing-wax or cabbages, and
not many kings either."

"That's quite true," replied Alice patiently, "but I've
found out a lot about Canada and I've had a jolly
good time, so you may grouse as much as you like—
I'm quite satisfied."

And so they went home, and the funny part of it is,
Alice did not wake up—for she had not been dreaming
at all.

MISCELLANEOUS

COMING EVENTS

Ats. under Coming Events: The per month list, unless given, was advertised in the Call.

Sept. 11—James Wallis, eyesight specialist at Queen's Hotel.

Sept. 12—"Fighting Coward" at the Gleichen (5th. Mail).

Sept. 13—Gleichen Fifth Annual Social Fair.

Every Monday—H. D. Powers, the Eye Specialist at the Queen's Hotel.

TOWN AND DISTRICT

The Gleichen school staff for the current term is comprised as follows: Principal R. H. Pothier, Miss Flynn, Miss Giles, Miss Hall and Miss Kent.

Peter MacLean has been appointed official registrar for the Gleichen polling subdivision by the Dominion returning officer. As there are a number of new residents they should see that their names are placed on the list as soon as possible.

Mr. Robson who has been connected with the Canadian Bank of Commerce here for the past five years, and better known to his friends as "Robby" has been transferred to another branch.

James Murray, district agricultural adviser, corn growers to collect their seed corn now as frost may not be long delayed. Also to keep corn shows in mind and send some of your best product to find out how it compares with what others are growing. Plan to visit one of the shows as there is no other "just as good" to learn what constitutes good corn seed. The Alberta show is to be held at Lethbridge this year, Nov. 11 and 12.

The death occurred in Toronto last week of Mrs. Beulah A. Walsh, wife of Mr. Justice Walsh. Mrs. Walsh's death was preceded by a long illness. For a number of years Mrs. Walsh has been an invalid, and for the past several years has resided in Toronto. Mrs. Walsh was born in Orillia, Ont. and had reached the age of 64. Besides her husband, Mr. Justice Walsh, she is survived by one son, Leigh L. Walsh, practised law in Gleichen for a short time. She has many friends here who extend their sympathy to him.

James W. Wallis, O.D., optometrist, of Calgary, will be at the Queen's Hotel, Calgary, on Friday, September 11, by the practice of his profession. Have your eyes scientifically examined and the correct glasses fitted, and

Mrs. Ed. Gougeon is confined to bed with a severe attack of sciatica, in the home of F. E. Pobst.

Captain Grant was in from Craigston Monday and states a conservative estimate of the crop in that district this season is twenty bushels to the acre, that is considering crops in the stubble, spring plowing and summerfallow. The grain captain has promised the Call a crop report for next issue.

The last issue of the Quebec Chronicle, prior to that paper's disappearance from the field, carried the editor's farewell, in which he wrote in part:

"Newspapermen was aptly styled long since the 'Fourth Estate' because it lives in but of the workshop world. It is not a mere recorder, it is a recorder. Hence it is that beneath a protective armor of utter criticism your newspapermen conceal a devotion to his 'rag' that can be likened only to the attachment of the seafarer to his chosen ship. Ships, however—no matter how staunchly built or how staunchly manned—must reach the end of their voyages at last, and the Chronicle has run its course. We for our part are grateful for the privilege of having contributed in however small degree to the traditions founded by Brown and Meagher, by McMillan and St. Michel. If we have had our share of criticism, we have received our modicum of praise; we have known moments of victory notwithstanding moments of defeat. It is therefore with a measure of discreet gratitude and good wishes to the readers as the last form is locked up, as the press prints out its final edition of the Quebec Chronicle, that the editor writes, 'adieu' to the layman may be no more than a meaningless number, but that to every cub or printer's devil who has served his apprenticeship in the craft is a grateful 'adieu' of the end."

Mega-phone Methods

If you had a voice like thunder, with a megaphone attachment you could not read to many people as you can through our want ads. You have not got the value but our power is at your service at the very lowest.

Notice under this heading 15 words or under 50c. first insertion and 10c. each subsequent insertion—1 weekly \$1. Over 15 words one cent per word for each insertion. When any brand name is to be cut or charge of 50c. each is made. Brand reading notices \$1.50 each annual, three insertions. Over 15 words 1 cent per word extra each for serials. In order to insure publication CASH MUST accompany each notice.

FOR SALE—Gasoline engines, suitable for chopping. One 5 H.P. single trap engine, good condition. One 5 H.P. portable engine, almost new. One 5 H.P. Canadian (Gleichen) (gas). Apply Indian Agent's office, Gleichen. 25

LOST—Buy's Overcoat, on road between Gleichen school and his home. Apply W. C. Larrabee. 25

FOR SALE—Rural extension dining table, phone 85. 25

LOST—Ladies' gold watch with monogram on back. Reward if returned to Miss W. W. Brown, Gleichen. 25

WANTED—Situation by man and wife on ranch. Capable of taking full charge. Good mechanic. Apply Frank Fulger, Gleichen. 25

FOR SALE—Good Road Saw with pipe for sale. W. M. Lyle, Arrowood. 21d

WANTED—About 2000 sheaves of straw for green feed. Apply W. J. Montgomery, Gleichen. Phone No. 111. 24d

WANTED TO BUY—A Good Milk Cow, Fresh, Phone 405, Bennett Bros. Gleichen. 25d

FOR SALE—Automobile and Taylor separator, 27 inch cylinder, 42 inch separator, 15-50 Tins engine. All fit first class shops. Wm. Hill, R. H. No. 2 Valton. 25

WANTED—One Fuller Brush salesman. Small investment. Good pay for the fellow who will hustle. No former selling experience required. Write H. S. Nelson, Duchesne, Sales Manager. 25

LOST—Eastern Star's Pin. Kindly return to Mrs. W. E. Evans. 30d

LOST—Man's Gold Watch, between Bow River Bridge and Gleichen, on trail. Reward for return to Box W, Call office. 30d

Here and There

All tourists' records, motor and train, are being burnt at Banff, Alberta, this year. More than 11,000 were registered by the first of August with this big rail yet to come. As many as 1,000 were under canvas at one time in the Government auto camp ground.

Maple sugar and maple syrup production in Canada during the season of 1925 amounted to 3,781,389 pounds and 1,072,289 gallons, respectively, with an aggregate value of \$432,541.45. This compares with an output of 3,888,415 pounds of maple sugar and 1,370,690 gallons of maple syrup during 1924. Quebec provinces accounted for over 90 per cent. of the production of maple sugar and over half of the output of maple syrup.

Production of the four basic industries of British Columbia during 1924 aggregated a value \$210,692,795, as compared with \$387,048,041 in the previous year, according to a statement issued by the Provincial Statistics Department. The 1924 production was made up as follows, with 1923 comparative figures in brackets: Forest products, \$46,702,960 (1924: \$74,460); agriculture, \$60,029,224 (1923: \$58,718,787); mines, \$48,704,004 (1923: \$42,201,201); and fisheries, \$52,956,605 (\$28,789,064).

The Vision of Wealth

Few men are entirely free from the pleasant but indefinite vision of some day "striking it rich". Those who, trusting their future to this vague illusion, spend all and save nothing, can never hope for independence. All fortunes are not gained by thrift alone, but the habit of systematic saving will bring you far along the road to prosperity.
